# INDUSTRY 4.0 —ADVANCED MANUFACTURING
## INDUSTRY TRAINING

**FANUC**

## Prepare your workforce

with the core competencies and automation technology skills for today's manufacturing industry

Recommended safety procedures are integrated into all training exercises. The course consists of lectures, chapter reviews, demonstrations and a series of lab exercises designed to reinforce what the student has learned. In addition to lab exercises, a pre-test and a post-test are used to measure mastery of objectives.

## Industry Recognized Credentials

## Robot Operations

and

## Handling Tool Operation and Programming
