Online
3 credits

***Your Choice** is the ultimate in flexibility, allowing you to decide how to attend each class period. Choose between live instruction (streamed through web conferencing on campus or straight to your personal device) and fully online instruction, where you can view the class lecture on your own time. This allows you the flexibility of completing activities and assignments at a time that works for you while also giving you the option to have virtual face time with the instructor and your classmates.

**This course should be taken in the fall semester, prior to the final spring semester. This course will be used to build the requirements for the final capstone project that will be completed in 10152113 Applications Development.
